EDUCATION

B.Tech in Information and Communication Technology

2023 – 2027

Marwadi University (NAAC A+), Rajkot — Pursuing

TECHNICAL SKILLS

Languages:	Java, JavaScript, Python, C++, C, SQL, Dart (Flutter)
Frontend:	React.js, HTML5, CSS3, Tailwind CSS, Three.js
Backend:	Node.js, Express.js, REST APIs
ML / AI:	Scikit-learn, Librosa, MFCC, Reinforcement Learning, A*, BFS/DFS
Databases:	MongoDB, MySQL
Tools / Cloud:	Git, GitHub, AWS (Cloud Foundations)

WORK EXPERIENCE

Full Stack Developer Intern — SilverLines Technology

May 2024 – July 2024

On-site, Rajkot

- Built web applications using React.js (frontend) and Laravel (backend), focusing on clean code and user-friendly design.
- Developed a Bus Booking Application prototype with core booking flows and cloud deployment.
- Collaborated with the team on testing, debugging, and deploying applications to production.

PROJECTS

Class Connect – Learning Management System (LMS)

Tech Stack: React.js, Node.js, Express.js, MongoDB, WebRTC, Socket.IO

- Built a full-stack LMS with real-time virtual classrooms using WebRTC and Socket.IO, enabling live classes, collaborative whiteboard, and instant messaging.
- Implemented assignment submission, quiz system, role-based auth (student/instructor), and lecture material sharing (PDFs, PPTs, notes).

Music Instrument Identification – Machine Learning

Tech Stack: Python, Librosa, Scikit-learn, MFCC, Random Forest, SVM, Logistic Regression

- Built an audio classification system that identifies musical instruments from audio signals by extracting MFCC features using Librosa.
- Trained and benchmarked Logistic Regression, SVM, and Random Forest models — Random Forest achieved ~97% accuracy on the test set.
- Covered the full ML pipeline: audio signal processing, feature extraction, supervised learning, model evaluation, and performance visualization.

Bhagavad Gita App – AI-Powered Spiritual Mobile Application

Tech Stack: Flutter, Dart, Flutter TTS, AI Integration | github.com/MANAVmandlia78/Bhagvat-gita-app

- Designed and developed a full-featured cross-platform spiritual app providing access to all 18 chapters and 700+ shlokas of the Bhagavad Gita with trilingual support (Hindi, English, Sanskrit).
- Integrated an AI-powered conversational assistant embodying Lord Krishna's persona, enabling users to seek guidance grounded in Gita teachings through natural language interaction.
- Built audio playback using Flutter TTS for shloka recitation, bookmark/save functionality for favourite verses, and character introduction modules profiling key figures from the Mahabharata epic.

RESEARCH PUBLICATION

Virtual Acoustic Scene Reconstruction Using Spatial Audio Processing

April 2026

SCI-2026 International Conference — Swinburne Vietnam, Hanoi, Vietnam (28–29 April 2026)

Co-authors: Tapan Nahar, Chandrasinh Parmar (Marwadi University); Chirag Joshi, Vishal Das, Chandra Prakash Gupta (Manipal University Jaipur)

Paper Link: [View Research Paper](#)

- Researched virtual acoustic environment reconstruction using spatial audio processing and 3D audio rendering for immersive real-time applications.

CERTIFICATIONS & ACHIEVEMENTS

International Research Paper — Presented at SCI-2026, Swinburne Vietnam, Hanoi — April 2026

AWS Academy Graduate – Cloud Foundations - [certificate link](#)

Flutter Development — Udemy — Comprehensive Flutter & Dart app development - [certificate link](#)

Advanced Web Technology — Certified in modern advanced web development concepts - [certificate link](#)
